# Wind Generation, Max Capacity Tuesday December 5, 2017

**1 to 5 Day**

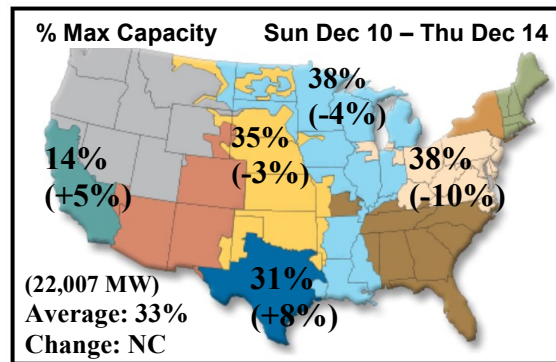

(Changes noted are same-day changes)

**1 to 5 Day**

- Slight same-day increase vs yesterday
- Highest wind performance MISO to PJM

**6 to 10 Day**

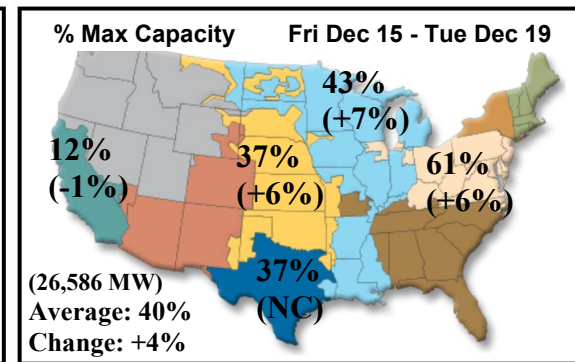

(Changes noted are same-day changes)

**6 to 10 Day**

- Lowest wind performance CAISO
- Highest wind performance MISO to PJM, with SPP close behind

**11 to 15 Day**

(Changes noted are same-day changes)

**11 to 15 Day**

- Same-day increase vs yesterday
- Highest wind performance PJM

### Reference

The total (MW) noted is the hourly average of the five regions added together

The “average” is calculated by taking the forecast wind generation value each hour over the time frame noted divided by the max capacity for each region

The “change” is same-day change from the previous day’s forecast (if there was one).
